

Kitchen & Tap

Veteran-Owned Hospitality Pricing & Profitability Platform

Executive Summary

Kitchen & Tap is a hospitality-focused pricing and profitability platform designed specifically for bars, restaurants, clubs, social organizations, veterans organizations, and small hospitality operators.

The platform helps operators calculate drink pricing, food pricing, profitability, waste impacts, tax-inclusive pricing, and operational margins through simple and approachable tools.

Unlike bloated restaurant software systems, Kitchen & Tap focuses on a single core problem:

Helping hospitality businesses price products profitably and consistently.

Veteran-Owned Business

Kitchen & Tap is proudly veteran-owned and built with a practical, operations-first mindset shaped by real-world hospitality and service experience.

The company aims to support:

- Independent operators
- American Legions
- VFWs
- Veterans organizations
- Social clubs
- Small hospitality businesses
- Nonprofit hospitality organizations

Mission Statement

Kitchen & Tap exists to simplify menu pricing and profitability for bars, restaurants, and clubs through approachable, operator-friendly tools.

Vision

To become the go-to lightweight pricing and profitability platform for independent bars, restaurants, American Legions, VFWs, lodges, and hospitality operators.

Core Problems Being Solved

Bars & Clubs

- Inconsistent drink pricing
- No simple way to track pour costs
- Difficulty updating prices when liquor costs rise
- Beer waste and draft loss issues
- Overcomplicated inventory systems

Restaurants

- Recipe costing challenges
- Ingredient price fluctuations
- Portion inconsistency
- Difficulty understanding actual food costs
- Maintaining profitability

Free Version Structure

The free version of Kitchen & Tap focuses on manual calculators and pricing tools.

Included Features:

- Liquor calculator
- Keg calculator
- Wine calculator
- Packaged beverage calculator
- Food calculator
- Tax handling
- Rounding options
- Waste calculations
- Markup and target cost calculations

Free version limitations:

- No saved items
- No reports
- No inventory tracking
- No cloud storage

Paid Subscription Structure

Bar Pro — \$6.99/month

- Save liquor pricing
- Save keg pricing
- Save wine pricing
- Save packaged beverage pricing
- Bar Back inventory page
- Beverage reporting tools

Restaurant Pro — \$9.99/month

- Pantry management
- Recipe builder
- Ingredient tracking
- Portion costing
- Food profitability reporting

Full Hospitality Pro — \$12.99/month

- Access to all Bar and Kitchen tools

- Unified reporting system
- Full operational dashboard

501(c)(3) & Veterans Organization Discounts

Kitchen & Tap plans to offer discounted pricing for qualifying nonprofit organizations and veterans organizations.

Potential organizations include:

- American Legions
- VFWs
- Charitable hospitality organizations
- Veterans organizations
- 501(c)(3) entities

Planned discount range:

- 15%–25% off monthly subscription pricing

Bar Back Concept

Bar Back will act as the beverage management and inventory section of Kitchen & Tap.

Workflow Example:

1. User calculates Tito's pricing
2. User saves item
3. Item appears in Bar Back automatically
4. Operator updates pricing over time

Bar Back Features:

- Saved liquor items
- Saved keg items
- Saved wine items
- Search functionality
- Cost change tracking
- Printable pricing sheets
- Beverage menu reports

Pantry & Recipe Builder Concept

Pantry will evolve into a lightweight kitchen inventory and recipe management system.

Pantry Features:

- Ingredient database
- Bulk pricing storage
- Recipe builder
- Ingredient cost references
- Portion costing
- Inventory quantity tracking

Inventory Concept:

Operators will track desired quantities versus current inventory on hand.

Example:

- Chicken Breast — Desired: 40 lb — Current: 12 lb
- Fries — Desired: 3 cases — Current: 1 case

Smart Workflow:

If an ingredient is added during recipe building and does not exist in Pantry, the system will automatically create it.

Reporting Features

Kitchen & Tap reporting tools will help operators understand profitability quickly.

Planned Reports:

- Liquor pricing sheets
- Beer menu pricing reports
- Wine profitability reports
- Recipe profitability reports
- Cost change reports
- Inventory shortage reports
- Margin reports

Technology Stack

Initial Technology Stack:

- Next.js
- React
- Tailwind CSS
- Vercel hosting
- GitHub version control

Planned Future Stack:

- Supabase or Firebase authentication
- Cloud database systems
- Stripe subscription integration

Development Roadmap

Phase 1 — MVP

Build calculators and deploy public beta.

Phase 2 — Public Beta

Gather feedback from bartenders, restaurant operators, and hospitality workers.

Phase 3 — Accounts & Paid Features

Add user authentication, cloud storage, and subscriptions.

Phase 4 — Bar Back

Build beverage inventory and pricing tools.

Phase 5 — Pantry & Recipe Builder

Build kitchen inventory and recipe systems.

Phase 6 — Advanced Reporting

Add PDF exports, printable sheets, and profitability dashboards.

Immediate To-Do Checklist

- Finalize calculator styling
- Improve mobile responsiveness
- Test tax calculations
- Test rounding logic

- Add footer branding
- Push project to GitHub
- Deploy beta publicly on Vercel
- Gather feedback from hospitality operators
- Design Bar Back page
- Design Pantry page
- Research Stripe integration
- Research Supabase authentication

Long-Term Goal

Create a lightweight hospitality profitability platform that helps independent operators understand costs, pricing, and margins without the complexity of enterprise restaurant software.
